

HP Hemanth Raj

No. 367, O.V. Joseph Street, GG Nagar, Chennai – 600037

Mobile: +91-8861286717

Email: hemanthrj@gmail.com

Professional Summary

- Spearheading advanced cloud-native data center architectures, with expertise in VxLAN BGP EVPN, SD-WAN, and GCP networking; currently delivering scalable solutions at Google.
 - Demonstrating 14+ years of leadership in high-performance network design, migration, and optimization across hyperscale, finance, and telco environments.
 - Crafting robust, automation-driven network solutions using Python, Ansible, and GitHub-based CI/CD workflows to increase performance, security, and availability.
-

Education

Bachelor of Engineering – Electronics & Communication

Mepco Schlenk Engineering College, Anna University – 2009

Technical Skills

1. **Routing & Switching:** BGP, MP-BGP, OSPF, IS-IS, EIGRP, RIP, VRFs
 2. **Data Center:** Cisco Nexus (5k, 7k, 9k), Arista 7280/7150, Juniper EX/QFX, Metamako
 3. **Virtualization/Cloud:** VxLAN, NSX-T, SDN, AWS, GCP, Azure, VMware
 4. **Automation:** Python, Ansible, Git, CI/CD pipelines
 5. **Security:** ASA, ZBF, IPsec, GRE, AAA, ACLs, Port Security
 6. **Tools:** GitHub, NetBox, SolarWinds, SNMP, NetFlow, Wireshark
 7. **Operating Systems:** Cisco IOS-XR, NXOS, EOS, Junos, Linux
-

Core Competencies

Network Architecture | Cloud Networking (GCP, AWS) | VxLAN BGP EVPN

SD-WAN | High Frequency Trading (HFT) Networks MPLS | ISP Backbone Design

Low Latency Design | CI/CD Automation | Ansible | Python | NetDevOps

NSX-T Arista, Cisco Nexus, Juniper OSPF, IS-IS, BGP, MP-BGP, LDP

VPN (L3VPN, VPLS, VPWS) | Data Center Fabric System Integration | Network Security

IP/MPLS | QoS | Multicast | Network Migration | HLD & LLD Documentation

Professional Experience

GOOGLE — *Network Distinguished Engineer*

Nov 2020 – Present

- Spearheading architecture and deployment of Google Cloud VMware Engine (GCVE) data centers across APAC.
- Leading VxLAN BGP EVPN implementation using Cisco Nexus 9300 to build scalable, automated leaf-spine topologies.
- Navigating complex SD-WAN integration with Versa across branch and hub architectures.
- Demonstrating GCP networking design with OVS on compute stack for multi-tenant segmentation and performance.
- Triaging and resolving critical network infrastructure issues impacting global service availability.
- Crafting CI/CD deployment pipelines using Ansible, Python, and GitHub for NetDevOps rollouts.
- Leading CDN infrastructure design for Google Cloud customers to improve content delivery efficiency.

VMWARE — *Member of Technical Staff*

Nov 2019 – Aug 2020

- Spearheaded NSX-T integration with AWS and SD-WAN across multi-data center environments.

- Building and validating AWS cloud networking stack performance on compute nodes.
- Demonstrating cross-cloud packet walkthroughs and traffic analysis with custom test plans.

ALPHAGREP SECURITIES — *Network Architect*

Sep 2018 – Apr 2019

- Leading design of ultra-low-latency trading networks using Metamako and Exablaze for 15 exchange colocations.
- Crafting high-performance architecture with Arista 7150S, Nexus 3548, ASA firewalls, and VPNs.
- Building Python-based deployment automation for rapid provisioning and failover testing.

IP INFUSION — *Lead QA Engineer*

Mar 2018 – Aug 2018, May 2019 – Oct 2019

- Testing and deploying Whitebox low-latency switches for WAN connectivity.
- Navigating customer use-cases for VxLAN migration in IXP networks (LINX project).
- Leading interoperability testing across Cumulus OS and OcNOS for global OEM partners.

MICROSOFT — *Network Design and Implementation Engineer*

Mar 2014 – Aug 2017

- Spearheaded SDN/NFV and VxLAN deployments for Azure Cloud and Microsoft O365.
- Leading documentation of HLD/LLD for Microsoft's ASN 8068 caching infrastructure.
- Demonstrating advanced troubleshooting across multi-cloud and HFT networks using automation tools.

ERICSSON — *System Test Engineer*

Oct 2011 – Mar 2014

- Designing and implementing MPLS-based ISP core networks with BGP, IS-IS, RSVP, and VPLS services.

- Leading L2/L3 VPN provisioning, traffic engineering, and SP QoS deployment.
- Deploying triple-play services (VoIP, IPTV, Internet) across Metro Ethernet backbone.

CISCO SYSTEMS — *Network Consulting Engineer*

Oct 2010 – Oct 2011

- Leading ISP customer migration from IOS to IOS-XR as part of T-Mobile backbone transformation.
- Designing and supporting high-availability Layer 2/3 infrastructure with QoS, ACLs, and MPLS VPN.
- Preparing comprehensive LLD documentation and resolving 3rd-line escalations.

Certifications

- Cisco Certified Internetwork Expert (CCIE #28593) – Routing & Switching
 - Cisco Certified Internetwork Professional (CCIP)
 - Cisco Certified Network Professional (CCNP)
 - Cisco Certified Network Associate (CCNA)
 - Ericsson Certified Routing Professional (ECIP)
 - Ericsson Certified Associate (ECA)
-
