

Jeff Shomali

Senior Software Engineer (Web, Mobile)

 San Francisco, CA
 (415) 504 1135
 jeff@shoma.li
 <https://shoma.li>
 <https://github.com/JeffShomali>

Full-Stack Engineer with 8+ years of experience designing and delivering scalable web and mobile (iOS/Android) applications. Proficient in TypeScript, JavaScript (ES6+), React.js, Next.js, React Native, Node.js, and GraphQL, with expertise across frontend, backend, and API development. Skilled in cloud platforms (AWS, Docker, CI/CD pipelines), performance optimization, and testing automation (Cypress, Playwright, Jest, SonarQube) to ensure reliability and scalability. Experienced in software architecture, Agile leadership, and cross-functional team mentorship, with a proven track record of building end-to-end solutions in both startup and enterprise environments.

Experience

Senior Software Engineer @ Apple

2021 - Present

- Strategic Technical Guidance: Providing comprehensive guidance on solution architecture, tool selection, and the overall technical landscape.
- Creation of High-Performance Experiences: Developing from the ground up, highly performant web-based experiences tailored for Apple's Executive team.
- Efficient UI/UX Implementation: Transforming UI/UX design wireframes into pixel-perfect code, ensuring the visual integrity of applications.
- Cutting-Edge Web UI Solutions: Crafting sophisticated web UI solutions compliant with Apple's design standards, utilizing HTML, CSS, React, and other modern technologies.
- RESTful Service API Development: Architecting and building RESTful service APIs from scratch using Java Spring and Apache Velocity with GSF.
- Mentoring and Coaching: Nurturing the growth of junior technical contributors through mentorship and coaching.

Environment: HTML, CSS, JavaScript (ES6+), Typescript, React.js, Redux, Java Spring boot, Apache Velocity, Grafana, Splunk, Snowflake, Teradata, SingleStore, Kafka, Git, GitHub, SonarQube, CI/CD, Jenkins, Cypress, Postman, Newman, REST API, GraphQL, Microservices, Agile, Docker, AWS (EC2, S3, Lambda), Kubernetes (basic).

Full Stack Engineer @ Nice (North America)

2018 - 2021

- Mobile App Development and Engagement: Led iOS and Android mobile app development for the BlueBOLT project, resulting in a significant 45% increase in customer engagement.
- Database Transformation and Efficiency: Designed new databases, migrated existing ones to AWS, and achieved a 4x reduction in hosting costs while reducing average response time by 20%.
- Full-Stack Management and Release Excellence: Managed full-stack programming, delivering innovative features and retiring legacy apps, leading to the successful deployment of four bug-free releases.
- Web App Maintenance and CI/CD Optimization: Diligently maintained customer-facing web apps, resolved technical issues, and optimized CI/CD pipelines, resulting in a 30% improvement in processing speed and a 99% increase in error-free code deliveries.

Environment: JavaScript, React, React Native, Redux, Redux-Saga, Node (Expressjs and AdonisJs), PHP, MySQL, C++, Linux, and AWS.

Front End Developer @ Robert Half

2018 - 2018

- Product Feature Enhancement: Spearheaded the development of new product features aimed at conducting UX/UI A/B testing for the marketing team. This strategic initiative resulted in enhanced audience understanding, providing valuable insights for marketing campaigns.
- Cross-Team Coordination: Played a pivotal role in coordinating efforts between engineering, product teams, and the UI/UX development team to identify and prioritize customer requirements, ensuring the alignment of development efforts with user needs.
- Tech Stack Optimization: Led research and development activities to identify the optimal technology stack, driving the front-end and back-end migration process in collaboration with the marketing team. This optimization significantly enhanced system performance and user experience.

Environment: HTML, CSS, JavaScript, Nodejs and React, to support successful project implementation and development.

Full Stack Developer & Founder @ Tutyo

2016 - 2018

- Comprehensive Solution Documentation: Proficiently documented solution architecture throughout the project lifecycle, ensuring consistent compliance with specified requirements from design to deployment.

- Database Design and Custom Development: Designed new databases and data schemas while spearheading the development of a custom web application platform with 20+ unique features, elevating user engagement and system efficiency.
- Effective Third-Party Integration: Successfully integrated third-party services and external APIs, such as Twitter, Google Contacts, Mailgun, and Stripe, to implement an internal referral system, resulting in an impressive 50% increase in user retention.

Environment: HTML, CSS, SemanticUI, Bulma, JavaScript, jQuery, PHP (Laravel), MySQL, Linux, AWS (EC2, S3), and API integration (MailGun, Twitter API, Google Contact API, Stripe). These skills played a pivotal role in delivering a robust and feature-rich platform.

Full Stack Developer (Volunteer) @ Purrivity

2015 - 2016

- Adoption of Modern Front-End Technologies: Actively explored the latest front-end technologies during the development of a high-volume external web application. This initiative significantly accelerated web development, boosting efficiency by an impressive 40%.
- Full-Stack Proficiency: Demonstrated full-stack programming expertise while working on high-profile external web applications. Utilized Ruby on Rails, CRUD operations, and ORM database management to deliver four error-free releases, all delivered punctually.

Environment: HTML, CSS, Bootstrap, Ruby on Rails, and jQuery to accomplish these feats. This versatile skill set was pivotal in the successful development and optimization of web applications.

Education

Master of Science (MS) in Engineering Management

2020 - 2022

American InterContinental University - Phoenix, Arizona, US

Bachelor of Science (BS) in Computer Science

2018 - 2020

Trident University - Cypress, California, US

Open Source Projects

I maintain 95+ repositories across web, mobile, and automation projects. To keep this resume concise, I haven't listed them all here. Please explore my portfolio at shoma.li/projects.html or view my recent work at bit.ly/Js-resume, and you can also browse my GitHub at github.com/JeffShomali for the complete list.

Skills

Front End: React.js, TypeScript, JavaScript (ES6+), Next.js (SSR/SSG), Tailwind CSS, HTML5, CSS3, Responsive Design, Redux / Redux Toolkit / Zustand / React Query (TanStack Query), REST API, GraphQL, Node.js, Express.js, Vue.js, Angular, Svelte, Remix, Nuxt.js, NestJS, Progressive Web Apps (PWAs), Single-Page Applications (SPAs), JAMstack, Performance Optimization (lazy loading, code splitting, bundle size), CSS-in-JS, Material UI / Shadcn, Vite, Webpack, Npm, Yarn, Bun, Storybook, Figma, Sketch, WebSockets, WebRTC, D3.js, Three.js, Chart.js, Framer Motion, Animation Libraries.

Back End: Node.js / Express.js, Next.js (API Routes), MERN Stack (MongoDB, Express, React, Node), LAMP Stack (Linux, Apache, MySQL, PHP), MVC Frameworks (Laravel, Ruby on Rails, Django, Flask, AdonisJS), Microservices & REST/GraphQL APIs, RabbitMQ / ActiveMQ / Kafka, Redis, ORM (Sequelize, Prisma, TypeORM), Relational Databases (MySQL, MariaDB, PostgreSQL, SQLite), NoSQL Databases (MongoDB, Cassandra), Data Warehouses (Snowflake, Teradata, SingleStore), Logging & Monitoring (Splunk, Grafana, Sentry).

Mobile (iOS/Android): React Native, JavaScript (ES6+), TypeScript, Redux / Redux Toolkit, MobX, React Query (TanStack Query), Zustand (if hybrid web+mobile), React Navigation, Native Modules (Swift/Obj-C, Kotlin/Java), Expo / EAS, CI/CD, Code Push, Performance Optimization (Hermes, lazy loading, frame drops), Push Notifications, In-App Messaging, Offline Data & Caching, REST API, GraphQL, Firebase (Auth, Cloud Functions), App Store & Play Store Deployment, OTA Updates, UI/UX Design & Animation (Core Animation, React Native Reanimated / Gesture Handler), Testing (Jest, Detox), Code Signing & Provisioning, Material Design / Native UI Components, SQLite / Realm, Android Studio & Xcode Build, Version Control (Git).

DevOps & Testing: **DevOps:** Linux/Unix, Git, Apache, Nginx, **AWS**(EC2, IAM, S3, Route53, Code Commit, Code Deploy, Beanstalk, Lambda), VPS, Jenkins, Redis, Heroku, Docker, Vagrant, Azure Active Directory, SAML, LDAP.

Testing: Unit Testing (Jest, Vitest, Mocha, Jasmine), Integration & E2E Testing (Cypress, Playwright, Selenium, Puppeteer), Mobile Testing (Appium, Detox), API Testing & Mocking (Postman, Newman), Performance & Load Testing (JMeter), Code Quality & Coverage (SonarQube, ESLint, Prettier), TDD / BDD / DDD.

AI Utilization: ChatGPT (OpenAI), ChatGPT API, GitHub Copilot / Copilot X, Cursor IDE, Claude (Anthropic), Gemini (Google AI), Perplexity AI, DeepSeek, Grok (xAI), Whisper (speech-to-text), Deepgram (speech recognition), DALL-E, MidJourney, Stable Diffusion, AI for Code Generation, AI for Testing, AI for DevOps, AI for Design/Prototyping, AI for Documentation & Content Creation.

Architecture, Leadership & Agile: Software Architecture & System Design, OOP & SOLID Principles, Design Patterns, Data Structures & Algorithms, Agile / Scrum / Kanban, Jira, Confluence, API Design & Documentation, Code Reviews & Mentorship, CI/CD Collaboration, Unit / Integration / E2E Testing, Cross-functional Team Leadership, Stakeholder Communication, Technical Roadmapping, Performance Optimization.
