

John Kennedy Barsisa

Network Support Engineer

johnp.barsisa@gmail.com | [Web Portfolio](#) | +44 (0) 7776 514821 | [LinkedIn](#)

Professional Summary

Dynamic Cloud and Network Engineer with over 5 years experience in stabilising multi-site networks, rigorous packet-level diagnostics, routing, WLAN assurance and ITIL-aligned incident/problem management. Expert in translating real-world user needs into robust technical solutions and actionable product feedback, thriving in fast-paced environments where precision and resilience are critical.

Skills

Tech Stack: AWS, Azure, Python, Java, .NET, Terraform, Jenkins, Prometheus, MDM (Addigy), Git.

Product & Analytics: Product Roadmapping, Requirements Definition, Process Optimisation, KPI Tracking.

Certifications: AWS Certified Solutions Architect, Microsoft Azure Fundamentals, Scrum Master.

Professional Experience

FUNDLI.ai

Oct 2022 – Present

Cloud Engineer

- Designed and deployed AWS-hosted products using IaC (Terraform) and CI/CD (Jenkins), reducing deployment times by 40%.
- Managed over 100 users within an Active Directory environment, ensuring secure and efficient IT operations.
- Managed and supported a complex, multi-site network for over 50 key stakeholders, acting as the primary engineering contact to diagnose and resolve mission-critical connectivity and security issues remotely.
- Built monitoring and alerting with Prometheus and ELK, reducing mean time to detect and resolve incidents by 35%.
- Led the technical delivery of AI-powered features, coordinating implementation sprints with Jira and enhancing system integrations to improve user onboarding and feature adoption.
- Troubleshoot end-to-end connectivity and application issues across L1–L7, isolating packet loss, latency and DNS faults with Wireshark/tcpdump, consistently meeting SLA targets and improving MTTR.

ECOWAS COMMISSION

Apr 2022 – May 2024

Network Engineer

Leveraged AI, DevOps, Software, Embedded, Cloud, and Hardware expertise to deliver robust and intelligent network infrastructure.

- Built and maintained robust network infrastructures, utilising DevOps tools and cloud technologies to enhance network performance by 25%.
- Shaped technical direction by identifying operational gaps and translating real user needs into feature requests; proposed and developed custom Power Apps that improved business efficiency by 30%.
- Delivered analytical reports and visual dashboards to support IT strategy and operational decision-making.
- Administered the full enterprise network stack, including routing, switching, security (VPN, firewalls), DNS, and wireless infrastructure, to ensure seamless and reliable connectivity across all branch offices.
- Secured large-scale networks and managed VPN connections across multiple international offices, installing and configuring security protocols to protect against cyber threats.
- Configured and supported BGP/OSPF routing, VLAN/DHCP/DNS services, and NAT/ACL hardening; implemented policy-based routing for resilient failover.

AMAZON

May 2021 – Sept 2021

Operations Manager

Leveraged data-driven strategies and team leadership to ensure seamless operations, improve customer satisfaction, and support sustained business growth.

- Managed Amazon's Same Day Delivery program from route planning, sortation, and strict process management to ensure customer orders were sorted and delivered according to critical delivery time KPIs.
- Implemented lean principles to enhance operational efficiency, reflecting a target-driven approach to exceed expectations.

Education

University of Portsmouth

Sept 2015 - Nov 2020

BEng (Hons) Electronic Engineering

MSc (Hons) Electronic and Electrical Engineering
