

SUMMARY

Product manager with 5+ years driving data- and experimentation-led growth across B2B SaaS platforms. Owns the full user lifecycle - acquisition, activation, engagement, and retention - turning behavioral analytics, A/B testing, and cohort analysis into shipped product experiences with measurable impact (+20% retention).

EXPERIENCE

Vibrant Wellness

Aug 2022 – Present

Technical Program Manager (Product & Growth)

- Drove growth and lifecycle initiatives across web and mobile products, partnering with engineering, design, data, sales, legal, and marketing from ideation to post-launch.
- **Increased user retention by 20%** by analyzing behavioral and funnel data, identifying drop-off points across key user journeys, and shipping targeted activation and engagement improvements.
- Designed and ran A/B tests with clear hypotheses and guardrails on core flows (login, sign-up, onboarding), using results to prioritize a growth roadmap tied to measurable business impact.
- Lifted **UI/UX satisfaction ratings by 10%** through iterative, test-and-learn optimization informed by usability studies, cohort analysis, and market research.
- Shipped multiple enterprise SaaS feature rollouts using phased launches and AI-assisted evaluation suites to de-risk releases, ensure stability, and maintain international compliance.
- Used AI tools to accelerate experiment ideation, hypothesis generation, and analysis—integrating predictive, personalized features; owned third-party and CRM-adjacent integrations that improved GTM efficiency and supported expansion.

Tools: Jira, Confluence, Fullstory, Userpilot, HubSpot, Figma, n8n, Claude, Vercel, Supabase, Notion, Postmark, GitHub

Suzy

Apr 2021 – Oct 2021

Associate Product Manager

- Led a team of 7 on a market-expansion initiative, translating user insight into data-driven product recommendations.
- Ran market research and user-testing experiments that identified high-impact opportunities, **increasing daily user retention by 3%** through validated, user-friendly features.
- Analyzed engagement metrics and funnels to inform product optimizations, and partnered with international teams to drive product vision and global launch initiatives.
- Fostered a high-velocity test-and-learn culture through sprint planning and retrospectives, designing roadmaps, mockups, and wireframes to validate hypotheses quickly.

Tools: Jira, Confluence, Figma, Mixpanel, Segment, Braze, TestFlight, TestRail, SQL/JQL, Postman, GitHub

Logos News LLC

Feb 2020 – Apr 2020

Software Developer

- Designed and developed a user-rating engagement feature in an agile team, improving schema structure and reducing latency.
- Analyzed user behavior with Hotjar to drive design improvements that **increased web traffic by 8%** and deepened engagement.

Tools: TypeScript, Angular, Google Cloud Firebase, Hotjar, Trello, Confluence, GitLab

SKILLS

Growth & Product: Product-Led Growth (PLG), funnel & cohort analysis, A/B testing & experimentation, lifecycle management, activation/retention/expansion, roadmap prioritization, OKRs

Analytics & Tools: Mixpanel, Fullstory, Userpilot, Segment, Braze, Hotjar, SQL/JQL, Jira, Confluence, Figma

AI: AI-assisted experimentation, prototyping & insight generation; Claude, Gemini, n8n agent workflows; predictive/personalization features

EDUCATION

Georgia Institute of Technology, School of Computing – **Master of Science in Computer Science**

University of California Riverside, School of Business – **Bachelor of Science in Business Administration**

Santa Monica College, Computer Science & Information Systems Dept – **Computer Science Certificate**

3x hackathon participant; 2x Grace Hopper Conference attendee.
