Skills

- **Frontend Technologies:** React, TypeScript, JavaScript (ES6+), Next.js, Vue, Redux, Zustand, Jotai, Tailwind CSS, TanStack Query, MUI, Ant Design, CSS-in-JS, Responsive Design, Accessibility, SEO Best Practices, i18n (react-i18next)
- **Backend:** Node.js, Express.js, Nest.js, GraphQL, REST APIs, PostgreSQL, MongoDB, Python (basic), Microservices Architecture, API Design, Authentication & Authorization
- **Testing:** Jest, Vitest, Playwright, Cypress, Testing Library, Unit & E2E Testing, Visual Regression Testing
- **Performance & Tooling:** Webpack, ESLint, Prettier, Lighthouse, Storybook, CI/CD, Docker
- **Cloud & DevOps:** AWS (Lambda, S3, CloudFront, ECS, RDS), Azure (basic), Sentry, Monitoring & Logging
- **Soft Skills:** Product Collaboration, Mentoring, Debugging Expertise, Ownership Mindset

Experience

Senior Software Engineer	GoPro	USA	04/2022 - Current
• Lead development of subscription platform serving 2.5M+ users, using React, Next.js, TypeScript, Nest.js. • Managed a large-scale performance epic improving both frontend and backend efficiency. Reduced page load times by 30%, improved API response times, and optimized Kafka-based event handling, boosting user satisfaction by 20%. • Co-anchored a major epic migrating from Redux to TanStack Query, streamlining async data handling and caching. Reduced API calls by ~40%, decreased bundle size, and boosted developer satisfaction by 25%. • Designed and delivered scalable internal APIs with Nest.js and PostgreSQL, improving team collaboration tools used by 200+ employees.			
Senior Software Engineer	Auditoria.AI (Startup)	USA	10/2020 – 02/2022
• Led development of a custom onboarding dashboard and back-end services using React, TypeScript, Nest.js, and PostgreSQL, reducing client onboarding time by 40% and improving data-driven insights. • Co-anchored large-scale refactoring and testing efforts, increasing unit and end-to-end test coverage from 30% to over 85%, strengthening product reliability and accelerating development cycles. • Collaborated with product and AI teams to design user-facing features driven by AI-generated insights, enabling the platform to adapt to client behavior and improve user engagement. • Optimized microservices and CI/CD pipelines for scalable deployment on AWS (ECS, RDS), enhancing reliability and performance.			
Software Engineer	Volvo Cars	USA	05/2017 - 09/2020
• Built the checkout and rental workflows for the European market from scratch, driving a 25% boost in completed transactions and streamlining user experience. • Engineered a real-time credit risk assessment module within the checkout flow using React and GraphQL, resulting in 18% higher conversion rates and a 12% decrease in checkout abandonment.			
YouTuber	Youtube		01/2023 - Current
• Produced 80+ technical videos demonstrating real-world React, TypeScript, and testing techniques, building a community of 3.2K+ aspiring frontend engineers.
