## PROFESSIONAL SUMMARY

Dynamic AWS Certified Solutions Architect with over 16 years of experience, specializing in **Designing, Implementing, Optimizing** and **Securing** AWS solutions. Expertise in integrating the AWS Well-Architected Framework, Cloud Adoption Framework, and System Design Principles in building highly secured, scalable, and fault-tolerant applications that ensure business continuity and agile response to market changes. Proficient in a broad range of AWS services, demonstrating a commitment to innovation, cost-efficiency, and maximizing the potential of cloud computing.

---

## CORE COMPETENCIES

**AWS Service Proficiency:** Extensive experience with EC2, ELB, Autoscaling, S3, VPC, RDS, Lambda, CloudFormation, CloudWatch, IAM, CI/CD Pipeline, EKS and more. Expertise in designing customer-centric cloud solutions that address specific business challenges, deliver value, and enhance customer experience. Skilled in deploying serverless, event-driven, and microservices architectures, along with layered solutions, for scalable and resilient cloud-native applications.

**Cloud Architecture and Strategy:** Mastery in designing scalable, secure, and resilient AWS cloud architectures. Skilled in strategic cloud migration, disaster recovery planning, and implementing business continuity solutions.

**Security and Compliance:** Specialized in strengthening cloud security posture through comprehensive security configurations, continuous compliance monitoring, and integrating best practices in cloud security. Expertise in identifying and mitigating vulnerabilities, ensuring the cloud environment is resilient against threats.

**Collaboration and Leadership:** Exceptional leadership skills with the ability to collaborate effectively across cross-functional teams, driving cloud adoption and fostering a culture of innovation and continuous improvement in cloud-centric organizations.

**Problem Solving and Innovation:** Adept at resolving complex technical challenges, driving innovations with AWS technologies, and aligning cloud strategies with business goals. Committed to continuous engagement with the latest AWS features, services, and industry trends.

---

## PROFESSIONAL EXPERIENCE

### AWS Cloud Solutions Architect

#### AT&T – Plano, TX (08/2021 – Present)

- Onboarded new clients into AWS by designing and deploying Landing Zones, configuring AWS Organizations, and setting up Account Factory to streamline secure, consistent creation of new AWS accounts.
- Designed and implemented scalable, secure, and reliable AWS cloud infrastructures, enhancing the overall system performance.
- Skilled in managing Linux and Windows systems in cloud environments, ensuring high availability and performance, while keeping them up to date using AWS Config and AWS Systems Manager for automated patching.
- Created multi-regional AWS deployments that align with data sovereignty regulations, facilitating smooth global scaling and performance optimization.
- Implemented comprehensive security frameworks using IAM policies, AWS security configurations, and continuous monitoring to ensure compliance with data protection and industry standards.
- Drove cost management initiatives by implementing automated monitoring, utilization metrics, and tagging policies, achieving significant reductions in cloud expenditures and enhancing resource utilization efficiency.
- Executed seamless migration of legacy systems to AWS, leveraging cloud-native services to modernize infrastructure, improving system performance, reducing operational costs, and enhance overall resilience.
- Designed and implemented comprehensive disaster recovery and business continuity solutions in AWS like Multi-region and Multi-AZ deployments, and also failover strategies to ensure minimal downtime and data integrity utilizing services such as AWS Backups, Amazon S3, Glacier, RDS Standby and cross-region replication.

### AWS Cloud Solutions Architect

#### Bank of America – Plano, TX (06/2017 – 08/2021)

- Supported the design and implementation of AWS cloud infrastructures, enhancing system scalability, security, and reliability.
- Led cross-functional teams in developing cloud solutions, ensuring alignment with technical and business requirements.
- Enforced rigorous cloud security protocols, ensuring robust defense mechanisms and compliance with industry best practices.
- Orchestrated the seamless migration of legacy systems to AWS, leveraging cloud-native services to modernize the infrastructure, enhance agility, and improve system resilience.

- Coordinated with global teams for the deployment of multi-regional AWS environments, ensuring seamless scalability and data sovereignty compliance.
- Implemented comprehensive disaster recovery strategies, significantly reducing recovery time objectives and ensuring business continuity.
- Led a cost-reduction initiative, implementing strategic resource allocation and efficiency improvements, which resulted in substantial savings and optimized cloud expenditure.
- Architected and implemented CI/CD pipelines using AWS services such as CodePipeline, CodeBuild, CodeDeploy, and CodeCommit, along with GitHub, streamlining the software development lifecycle, avoiding human errors and reducing deployment times.

## **AWS Cloud Architect**

### **Northern Trust Corporation - Chicago, IL (08/2013 – 06/2017)**

- Designed comprehensive AWS solutions, focusing on high availability, fault tolerance, and auto-scaling to meet demanding business requirements.
- Championed cloud security initiatives, ensuring robust defense mechanisms are in place and compliance with regulatory standards.
- Drove continuous improvement initiatives, leveraging AWS innovations for optimal system performance and cost-efficiency.
- Orchestrated large-scale data migrations to AWS, ensuring seamless transition, data integrity, and minimal disruption to business operations.
- Collaborated with software development teams to adopt DevOps practices, enhancing deployment speed and operational efficiency using AWS.
- Led training sessions for technical teams, enhancing their understanding of AWS services and best practices in cloud architecture.

## **AWS Engineer**

### **Cox Communications - Atlanta, GA (07/2009 – 08/2013)**

- Engineered resilient AWS environments, utilizing Auto Scaling, Elastic Load Balancing, and Amazon S3 to optimize application performance.
- Configured Amazon VPC to establish a secure, isolated cloud network, enhancing control over virtual networking environments.
- Automated cloud deployments and orchestrated infrastructure updates, minimizing human error and enhancing operational efficiency.
- Integrated advanced monitoring solutions using AWS CloudWatch, ensuring proactive management of system health and performance.

- Developed a robust tagging strategy for AWS resources, enabling detailed cost tracking, resource optimization, and effective governance.
- Enhanced system security by implementing a comprehensive identity and access management (IAM) strategy across AWS services.

---

## **EDUCATION**

Bachelor of Science in Computer Science, University of Buea, 2008

---

## **CERTIFICATIONS**

AWS Certified Solutions Architect – Associate  
AWS Certified Solutions Architect – Professional  
AWS Certified Security – Specialty  
AWS Certified Advanced Networking – Specialty

---
