

Mateusz Bialek

Software Engineer

Software engineer specializing in product analytics and marketing with experience developing data warehouse systems and experience in client-facing roles. I am passionate about robust software design, clean code, and user-centric product development.

Skills

Technical: Python, SQL, KQL, Azure Data Explorer, OOP, Airflow, Docker, Adobe Experience Platform, DevOps, Databricks, Kubernetes, Postgres, PowerBI, R, HTML/CSS, C#, Swift, VBA, React

Other: Fluent Polish speaker

Work Experience

Software Development Engineer - Adobe

Aug 2023 - Present

- Lead engineer of Adobe's solution engagement analytics (SEA) system, a data platform serving stakeholders across product management, sales, leadership and finance to measure product engagement and resource utilization.
- Responsible for all phases of SEA's software lifecycle, including development of new features, testing, release cycles and production support.
- Built and maintained the primary front-end UI for SEA which surfaced SEA's analytics to users as well as being a search engine and registry. This tool automated reporting requests from stakeholders reducing 80% of ad-hoc business intelligence workload.
- Led migration of SEA to Adobe Experience Platform and Databricks, focusing on data modelling and pipeline orchestration to modernize data infrastructure and align with business needs.

Senior Data Scientist - Adobe

Sep 2018 - Aug 2023

- Developed and maintained end-to-end pipelines and data connectors integrating frontend and backend product telemetry, log and CRM systems to deliver clean aggregated datasets to power actionable business metrics.
- Partnered with a network of stakeholders across product, engineering and finance teams to gather requirements and translate into development roadmaps.
- Led data quality improvement initiatives, securing buy-in from directors for governance framework and driving data reliability KPIs. Notably, I built a selenium UI testing application to monitor frontend telemetry capture which became adopted for product data quality monitoring resulting in a 50% drop of reported issues.
- Frequently presented to technical and non-technical stakeholders including product leadership to consult on data driven decisions.

Data Scientist - Adobe

Aug 2016 - Sep 2018

- Acted as consultant for specialist marketing analysis and strategy for Adobe Media Optimizer's (AMO) European client base overseeing millions in daily ad spend.
- Advised large brands on efficient structuring of Google AdWords PPC accounts to meet their goals cost-efficiently while aligning with AMO's ML-based bidding best practices.
- Designed and validated A/B experiments to measure campaign effectiveness as well as head-to-head experiments with competitors.
- Partnered with Product and Engineering teams to define customer health KPIs and assist with prioritising new features and bugs.

Marketing Account Manager - Adobe

Sep 2015 - Aug 2016

- Worked with external client stakeholders (including brands and retailers) to deploy marketing campaigns, ensuring successful delivery and measurement of ROI.
- Monitored daily marketing spend and industry trends to provide strategic recommendations.

Education

BEng Electronic Engineering, 2:1 - University of Southampton, 2014

A Levels: Economics - A, Mathematics - A, Polish - A, 2010
