SUMMARY

10+ years of experience designing and building data, API, full-stack, and cloud solutions. Committed to leveraging technology and harnessing leadership to drive business objectives and innovation. Proficient at collaborating with business stakeholders to translate strategic needs into effective, reliable, scalable and secure technology solutions.

Competencies: system design, software design, algorithm design, cloud architecture, version control, continuous integration, continuous delivery, API integration, data modeling, data integration, ETL, data warehousing, data visualization, data analysis, user experience UX analysis, project management, product ownership, leadership

Strong experience with: Python, Django, FastAPI, SQLAlchemy, JavaScript, TypeScript, React, HTML, CSS, SQL, PostgreSQL, Redis, Celery, AWS, Apache HTTP Server, Nginx, Linux, Bash, Git, Docker, Jira, OAuth2/OpenID Connect, third-party APIs/SDKs

Some experience with: Node, Java, PHP, C, GCP, Azure, Flask, Pandas, Express, D3, Webpack, Babel, Jest, MySQL, SQL Server, Oracle, Snowflake, Vertica, MongoDB, Elasticsearch, Spark, Kafka, Tableau, Kubernetes, LLM, NLP

PROFESSIONAL EXPERIENCE

Senior Software Engineer (Contract)

Jun 2024 – Present

Harvard University, Cambridge, MA (remote from New York City area)

- Collaborate with business stakeholders to analyze new strategic needs and design mission-critical solutions, including APIs and data systems, that integrate seamlessly with existing system.
- Lead implementation of API and data system features and contribute to UI development, managing projects and providing technical leadership and guidance.
- Contribute to cloud architecture and migration, ensuring seamless transition, improving scalability and availability, achieving elasticity, and cutting costs.
- Python, Django, FastAPI, SQL, PostgreSQL, JavaScript, TypeScript, Node, React, AWS, Redshift, Tableau, Docker, Git, Jira.

Senior Software Engineer

Sep 2020 – May 2024

Bento, Boston, MA (remote from New York City area)

- Built full-stack features for SaaS products that streamline and optimize dental insurance and transaction processing for providers, patients, employers, and internal stakeholders.
- Owned and developed various product features, including API endpoints, API integrations, data integration pipelines, data systems, and user interfaces.
- Collaborated continuously with business stakeholders, including customers, to analyze strategic needs and design effective solutions.
- Python, Django, SQLAlchemy, Postgres, SQL, JavaScript, TypeScript, React, Node, AWS, Docker, Kubernetes, Terraform, Git, Jira.

Software Engineer

Nov 2015 - Sep 2020

Harvard University, Cambridge, MA

- Built full-stack application delivering data analytics products that hundreds of US universities and colleges depend on for critical decision making.
- Built complex data system including data warehouse, data marts, data pipelines, and internal tools for data integration and data provisioning.
- Collaborated with cross-functional teams to design and implement comprehensive data governance framework, ensuring data integrity, security, and compliance across multiple platforms.
- Python, Django, Flask, SQL, PostgreSQL, JavaScript, Node, React, AWS, Redshift, Docker, Git, Tableau, Salesforce, Linux, Bash, Jira.

Graduate Assistant

May 2014 – Nov 2015

Boston University, Boston, MA

- Built and managed analytics databases, data models, and queries supporting graduate courses.
- Researched and produced course content on databases and cloud computing.
- SQL Server, Oracle, Postgres, MongoDB, Vertica, Python, JavaScript, AWS, MS Power BI.

Web Developer & Online Marketing Analyst

Dec 2012 - Dec 2013

Wakanow.com Ltd, Lekki, Lagos, Nigeria

- Doubled website visits to a rate of 7.5 million per year through email marketing segmentation, SEO, and UI/UX improvements. Wakanow.com is the Expedia of West Africa.
- JavaScript, HTML, CSS, SQL Server, Google Analytics, Excel, Google AdWords, Google Display Network.

EDUCATION**MS in Computer Information Systems**

Jan 2014 - May 2015

Boston University, Boston, MA

- Studied data structures and algorithms, system analysis and design, software design and patterns, databases, data warehousing, data mining, networks, cloud computing, project management, IT strategy/management.
- Obtained Graduate Assistantship following a very successful first semester.

BS in Economics & General Sciences

Washington State University, Pullman, WA

- Began my technology career with an on-campus position as a student technology consultant, providing help desk support and contributing to web development.
