SUMMARY

- **Site Reliability Engineer** with **2 years 10 months of experience** in managing **24x7 production environments**, automating deployments, and optimizing cloud infrastructure.
- Skilled in **AWS, Terraform, Ansible**, and **CI/CD** with **Jenkins**.
- Proficient in **monitoring and observability** using **Splunk, Zabbix**, and **BigPanda**.
- Adept at **incident management, disaster recovery (DR)**, and **infrastructure automation** with **Python** and **Bash**.
- Focused on ensuring **scalability, reliability**, and **high availability**.
- **Currently serving notice period** available to join immediately after **10th November 2025**.

PROFESSIONAL EXPERIENCE

Site Reliability Engineer

ICE Mortgage Technology, Pune

Jan 2023 – Present

- **Managed 24x7 production environments**, ensuring **99.9% uptime** and strict adherence to **SLAs, SLOs**, and **error budgets**.
- **Administered 1,200+ servers** across **Linux** and **Windows**, proactively monitoring system health and capacity.
- **Provisioned and automated infrastructure** using **Terraform** and **Ansible**, reducing deployment time by **50%** and implementing self-healing capabilities.
- **Engineered and maintained CI/CD pipelines** with **Jenkins** and **Docker**, automating deployments and improving release efficiency by **50%**.
- **Implemented blue-green and canary deployments**, reducing deployment risks and application downtime.
- **Developed Python and Bash scripts** to **automate routine tasks**, cutting manual effort by **35%**.
- **Created Splunk queries, alerts, and dashboards**, enhancing **monitoring, troubleshooting**, and **system visibility**, reducing MTTR by **30%**.
- **Designed and monitored SLIs/SLOs**, conducted **error budget analyses**, and participated in **post-incident reviews** to continuously improve service reliability.
- **Developed disaster recovery (DR) strategies** with automated failover and regularly tested recovery plans to minimize downtime.
- **Created automated runbooks and postmortem reports** to standardize **incident response** and **RCA processes**.
- **Migrated PostgreSQL databases** across data centers using **replication** and **backup-restore** processes to maintain data integrity.
- **Maintained Artifactory**, improving artifact retrieval speed by **25%**.
- **Optimized AWS infrastructure** (**EC2, S3, CloudFront, CloudWatch, VPC, IAM, ELB, Route 53**), improving **scalability, security**, and **cost-efficiency**.
- **Led incident management** and on-call rotations, ensuring quick troubleshooting and resolution of production-critical incidents.
- **Performed capacity planning and load testing**, proactively preventing bottlenecks and reducing unnecessary cloud spending.
- **Established SRE best practices** and **incident response playbooks**, improving team consistency and reducing average incident resolution time.

SKILLS

- **Programming Languages:** Python
- **Scripting & Automation:** Bash, PowerShell
- **Infrastructure as Code:** Terraform, Ansible
- **CI/CD Tools:** Jenkins, Git, Docker, Kubernetes (Basics)
- **Cloud Platforms:** AWS (**EC2, S3, CloudFront, CloudWatch, VPC, IAM, ELB, Route 53**), Azure (**VMs, Blob Storage, Monitor, Virtual Network, Load Balancer, Azure DNS**)
- **Monitoring & Observability:** Splunk, Zabbix, BigPanda, CloudWatch
- **Networking & Security:** F5 Load Balancer, AWS Security Groups, Networking Fundamentals
- **Databases:** PostgreSQL
- **Artifact Management:** JFrog Artifactory
- **Incident Management:** Root Cause Analysis, RCA Docs, DR Planning

EDUCATION

Bachelor of Technology

Stream: Computer Science and Engineering

Percentage: 72%

University: Shivaji University, Kolhapur

Years: 2018 – 2022

CERTIFICATIONS

- **DevOps with AWS, Docker: Continuous Delivery, Getting Started with ECS** — LinkedIn Learning
- **Linux System Engineer: Bash Shell Scripting for Automation** — LinkedIn Learning
- **PowerShell: Scripting for Server Administration and Learning PowerShell** — LinkedIn Learning
- **Using Python for Automation** — LinkedIn Learning
