OBJECTIVE

To obtain a Medical Directorship and/or Consultant Position in Primary and/or Urgent Care setting

MISSION

I am dedicated to providing comprehensive medical consulting services tailored to individual patient needs. My expertise includes general and specialized aesthetic consultations, preventive care, chronic disease management, and telemedicine services. With a patient-centered approach, I strive to ensure accurate diagnoses, effective treatment plans, and holistic care to promote health and well-being.

MEDICAL EXPERIENCE & EMPLOYMENT

Prashant Gupta LLC

May 2023 – Current

Seattle, Washington

Medical Consultant & Aesthetic Medical Services

- Provide remote aesthetic medical services, including Botox injection and Dermal Fillers
- Offering hair transplant consultation and travel services in Turkey
- With over 8 years of medical experience in Primary and Urgent care settings, I provide consulting services to various biotechnology and medical startup companies.
- Provide legal consulting services through medical case and chart reviews
- Manage Short-Term Rental Properties in Arizona

Evergreen Emergency Services, Inc.

February 2021 - Current

Kirkland, Washington

Urgent Care Physician

- Staffed as one of the lead Urgent Care physicians at EES clinics throughout the Kirkland, WA region with other mid-level providers, including Nurse Practitioners and Physician Assistants. I perform frequent chart reviews of mid-level providers to ensure optimal medical care is provided to our patient population.
- General Medical Consultations: Conduct thorough patient evaluations, including history-taking, physical examinations, and diagnostic interpretation.
- Telemedicine Services: Deliver virtual consultations for remote patient care, including follow-ups and management of minor ailments.
- Acute Care Management: Diagnose and treat acute medical conditions, providing prompt interventions in outpatient settings.
- Referral and Coordination: Collaborate with multidisciplinary teams for specialized treatments and refer patients to tertiary care when necessary.
- Patient Counseling: Provide empathetic and clear communication on diagnosis, treatment options, and lifestyle modifications.
- Occupational Health Services: Conduct health assessments, workplace screenings, and provide recommendations for employee wellness.
- Job duties included seeing approx. 30 patients a day, interpreting diagnostic testing and examination on each patient to reach an appropriate diagnosis and thorough treatment plan. Treatment often included suturing, splinting, reducing dislocations, providing on site medications and injections, and occasionally small procedures including I&D, trephination, and ingrown nail removals.

Northwest Permanente, P.C.

December 2020-Current

Vancouver, Washington

Locums Urgent Care Physician

- Employed and rotated through various Urgent care clinics throughout the Vancouver-Portland area, often requiring travel and adapting to new clinic settings and practices.
- Acute Care Management: Diagnose and treat acute medical conditions, providing prompt interventions in outpatient settings.
- Job duties included seeing approx. 30 patients a day, interpreting diagnostic testing and examination on each patient to reach an appropriate diagnosis and thorough treatment plan. Treatment often included suturing, splinting, reducing dislocations, providing on site medications and injections, and occasionally small procedures including I&D, trephination, and ingrown nail removals.

- Higher acuity patient care which includes diagnosing and managing chest pain, abdominal pain, syncope, complex infections and burns, amongst other complex patients.

Northwest ICE Processing Center

November 2, 2020-November 2, 2021

Tacoma, Washington

Primary Care Physician (STGi Contractor)

- Providing acute, chronic, and preventative medical care to detainees at ICE facility.
- Mentoring and performing chart reviews for certified Physician Assistants and Nurse Practitioners by providing appropriate evidence based on medical guidance and patient care.
- Preventive Care: Offer health education, screening programs, and vaccination services to promote wellness and disease prevention.
- Chronic Disease Management: Develop and manage individualized treatment plans for conditions such as diabetes, hypertension, and asthma.
- Infectious Disease Management for High-Risk patients, including diagnosing and treating patients with HIV, autoimmune diseases, and Hepatitis B and C patients.
- Referral and Coordination: Collaborate with multidisciplinary teams for specialized treatments and refer patients to tertiary care when necessary.
- Providing low acuity psychiatric and behavioral health medical care to detainees.
- Assisting with medical emergencies within facilities for detainees.
- Interpreting radiologic imaging, EKG, diagnostic lab results as well as providing routine vaccinations, performing minor in-house procedures, and splinting.

Teladoc Health

September 22, 2020-Current

New York, New York (Headquarters)

Telemedicine Urgent Care and Family Medicine Physician

- Providing telemedicine consultations for acute medical care needs for patients ranging from pediatric to geriatric populations.
- Deliver virtual consultations for remote patient care, including follow-ups and management of minor ailments.
- Chronic Disease Management: Develop and manage individualized treatment plans for conditions such as diabetes, hypertension, and asthma.

CHI Franciscan Health

August 2016-September 2020

Lakewood and Burien, WA

Board Certified Family Medicine Physician

- Staffed as one of the lead Urgent Care physicians at a new clinic in Lakewood, WA overseeing other mid-level providers, including Nurse Practitioners and Physician Assistants.
- Staffed at a converted COVID-19 triage center in Burien, WA where hundreds of patients were triaged, tested, and provided clinical treatment for COVID-19.
- Acute Care Management: Diagnose and treat acute medical conditions, providing prompt interventions in outpatient settings.
- Chronic Disease Management: Develop and manage individualized treatment plans for conditions such as diabetes, hypertension, and asthma.
- Preventive Care: Offer health education, screening programs, and vaccination services to promote wellness and disease prevention.
- Referral and Coordination: Collaborate with multidisciplinary teams for specialized treatments and refer patients to tertiary care when necessary.
- Occupational Health Services: Conduct health assessments, workplace screenings, and provide recommendations for employee wellness.

- Employed and rotated through various Urgent care and Family Medicine clinics throughout the Seattle-Tacoma area, often requiring travel and adapting to new clinic settings and practices.
- Job duties included seeing approx. 30 patients a day, interpreting diagnostic testing and examination on each patient to reach an appropriate diagnosis and thorough treatment plan. Treatment often included suturing, splinting, reducing dislocations, providing on site medications and injections, and occasionally small procedures including I&D, trephination, and ingrown nail removals.

Fox Valley Primary and Immediate Care

September 2015-August 2016

Aurora, Illinois

Urgent/Primary Care Physician

- Moonlighting as solo practitioner in an urgent care/walk in primary clinic seeing approx. 15-20 patients a day, providing comprehensive healthcare from minor injuries to management of diabetes, hypertension, and other complex medical conditions for pediatrics, adults, and geriatric patients.
- Acute Care Management: Diagnose and treat acute medical conditions, providing prompt interventions in outpatient settings.
- Chronic Disease Management: Develop and manage individualized treatment plans for conditions such as diabetes, hypertension, and asthma.
- Preventive Care: Offer health education, screening programs, and vaccination services to promote wellness and disease prevention.
- Patient Counseling: Provide empathetic and clear communication on diagnosis, treatment options, and lifestyle modifications.
- Duties included: interpreting diagnostic labs/tests, EKGs and x-rays, performing sports and school physicals, occupational health services, routine vaccinations, quick and appropriate medical decision making for treatment for acute and sometimes life-threatening conditions.

Waukegan Immediate Care

October 2015-August 2016

Waukegan, Illinois

Urgent/Primary Care Physician

- Moonlighting as solo practitioner in an urgent care/walk in primary clinic seeing approx. 10-15 patients a day, providing comprehensive healthcare from minor injuries to management of diabetes, hypertension, and other complex medical conditions for pediatrics, adults and geriatric patients
- Acute Care Management: Diagnose and treat acute medical conditions, providing prompt interventions in outpatient settings.
- Chronic Disease Management: Develop and manage individualized treatment plans for conditions such as diabetes, hypertension, and asthma.
- Patient Counseling: Provide empathetic and clear communication on diagnosis, treatment options, and lifestyle modifications.
- Duties included: interpreting diagnostic labs/tests, EKGs and x-rays, performing sports and school physicals, occupational health services, routine vaccinations, quick and appropriate medical decision making for treatment for acute and sometimes life-threatening conditions

Dr. Ram Manohar Lohia Hospital
