EDUCATION & CERTIFICATES

Bachelor of Engineering (ECE)

Srinivas Institute of Technology,
VTU Mangaluru – 2012

Chinmaya Vidyalaya, Payyannur

HSC and other schooling

CCNA (Cisco) Routing & Switching

AWS Certified Cloud Practitioner (Pursuing)

NETWORKING SKILLS

- Datacenter Networking
- IT Network Operations
- Firewall management, monitoring, and Troubleshooting
- Syslog and Network device log monitoring
- Network Monitoring via Solarwinds
- Quick learner of the process and tools.

SUMMARY

Network Engineer with 9+ years of experience in enterprise and cloud networking. Skilled in Cisco, Juniper, and AWS environments with strong knowledge of BGP, OSPF, SD-WAN, MPLS, and network security. Experienced in managing datacenter networks, VPNs, firewalls (Palo Alto, ASA, NSX-T), and automation for scalable deployments.

WORK EXPERIENCE

Hosting & Network Services Specialist

TOMIA GLOBAL (TELARIX)

(AUG 2023 – Till Date)

- Network & Security: Implement, manage, and monitor datacenter and cloud network security. Document and review for audits.
- Network Design and Infrastructure: Expertise in designing robust, scalable, and secure network architectures, including knowledge of routers, switches, firewalls, and load balancers.
- AWS Infrastructure: Deploy and administer virtualized infrastructure using AWS. Design and deploy scalable, highly available, and fault-tolerant network architectures.
- Managed over 40 IPSec & SSL VPN tunnels across AWS and on-prem, improving site-to-site availability by 20% through proactive monitoring and optimization.
- VPC Management: Configure and manage VPCs, subnets, route tables, and gateways.
- Network Security: Advanced knowledge of security protocols, intrusion detection systems (IDS), intrusion prevention systems (IPS), and threat mitigation strategies.
- Security Measures: Implement network security measures, including firewalls, VPNs, and security groups.
- Performance Monitoring: Monitor system performance and ensure compliance with security standards.

Network Engineer

Advanced Business & Healthcare Solutions

(JUN 2018 – JUL 2023)

- Firewall Management: Expertise in managing various firewalls including ASA, ASA v, VMWare NSX & NSX-T, FTDs, Barracuda, and Palo Alto.

AWS INFRASTRUCTURE SKILLS

- Maintain & deploy cloud applications
- Monitor system performance with security standards
- Responsible for application deployments like EC2, S3, VPC, Lambda etc.
- Cloud IPSEC VPN implementation

- Network Devices: Proficient with Cisco Nexus, HPE, and Juniper devices, including vPC, VSS, and EthChannel configurations.
- Datacenter Networking: Skilled in monitoring, managing, and troubleshooting datacenter networks and security.
- VPN Management: Experienced in VPN migration, configuration, monitoring, and troubleshooting.
- Network Protocols: Knowledgeable in MPLS, BGP, and OSPF architectures.
- Monitoring Tools: Worked with SolarWinds, including NetFlow Analyzer, Network Performance Monitor, and Network Configuration Manager.
- Packet Analysis: Experienced in packet capture and analysis using Syslogs and GUI tools like ASDM and FMC.
- Ticketing and Change Management: Familiar with Remedy ticket tool and change management processes.
- Security Concepts: Understanding of DoS, DDoS, Spoofing, Hash algorithms, IDS, and IPS.
- DHCP and DNS: Knowledgeable in DHCP and DNS configuration.
- Customer Solutions: Responsible for designing and deploying network solutions for customers and partners.
- On-Call Support: Participated in on-call rotation for 24x7 incident support.

IT Engineer

RAC IT Solutions

(MAR 2016 – JUN 2018)

- Hardware Management: Configuring, installing, deploying, and maintaining computer, laptop, and server hardware.
- Asset Management: Experienced in using the Assettiger Asset Management tool for enterprise asset management.
- Troubleshooting: Strong knowledge and skills in troubleshooting hardware issues.
- Hardware Testing: Testing completed hardware models to meet client requirements.
- Peripheral Support: Providing support for CPUs, support logic, microprocessors, printers, and disk drives.
- Data Management: Performing data backups and disaster recovery operations.
