SUMMARY

Software Developer with **4 years of experience** building enterprise applications across **healthcare payer systems, infrastructure management, compliance, and audit** domains. Experienced in developing backend services for **member eligibility, claims processing, and provider data workflows**, along with frontend interfaces for internal users. Proficient in **Java, Spring Boot, React.js, AWS, and Docker**, with hands-on experience in API development, database integration, cloud-based deployments, and automated release pipelines.

EXPERIENCE

Blue Cross Blue Shield | Software Developer | USA

Sep 2025 – Present

- Engineered Java backend services using **Spring Boot** for member eligibility, claims lookup, and provider data processing, handling **90K–140K records per day** across multiple healthcare services.
- Maintained **REST APIs** integrated with **PostgreSQL and Oracle**, enabling **12–18 internal users** to complete **25–30 daily** claims review and query operations.
- Executed batch and scheduled processing using **Spring Batch and Quartz**, running **8–10 jobs per cycle** with **15–45 minute** execution windows to load and validate data from **5 upstream systems**.
- Diagnosed and resolved data and processing issues by analyzing application logs, **API traces**, and **SQL queries**, collaborating with QA and business teams to ensure data accuracy.
- Supported applications hosted on **AWS (EC2, RDS)** by reviewing logs and metrics to identify and correct issues affecting healthcare data workflows.

KPMG | Software Developer | India

Jan 2022 – Jul 2023

- Architected backend services using **Java 11 and Spring Boot** to generate audit reports, processing **18K–22K records per monthly cycle** with validation and persistence to **PostgreSQL**.
- Delivered frontend dashboards using **React.js and TypeScript**, enabling **20–25 compliance users** to monitor audit progress, review exceptions, and confirm report readiness.
- Implemented **Spring Security and JWT-based role authorization** across **15 REST endpoints**, ensuring controlled access to sensitive audit data.
- Orchestrated **CI/CD pipelines** using **GitLab CI/CD and Docker**, supporting **two deployments per week** across development and UAT environments.
- Processed data from **4 external audit systems**, transforming CSV files and API payloads into standardized internal formats.
- Provisioned and updated cloud infrastructure using **Terraform**, coordinating environment changes with platform teams.

Adani | Full-Stack Developer | India

Nov 2020 – Dec 2021

- Built an internal project tracking application using **Java 11, Spring Boot, and React**, used by **6 infrastructure units** and **25+ users**.
- Implemented backend services to process safety inspection submissions, validating and storing **70K–90K records** in **PostgreSQL** for compliance tracking.
- Developed responsive UI components using **JavaScript, HTML5, and Bootstrap** for inspection forms and task management.
- Optimized database access using **JPA and Hibernate**, improving data consistency and retrieval for weekly reports.
- Managed build and deployment workflows using **Jenkins and Docker**, delivering releases every **1–2 weeks** across development and QA environments.

Trigent Software | Software Developer | India

May 2020 – Oct 2020

- Produced weekly performance reports using **Power BI and Excel**, covering **35K+ monthly active users**.
 - Generated product usage and customer behavior datasets using **SQL and Python**, supporting analytics for **12 mobile and web releases**.
 - Audited incoming data feeds to identify inconsistencies and missing values, flagging **30+ data issues** prior to reporting.
 - Standardized reporting templates and metric definitions across product, marketing, and support teams.
 - Presented analytical insights to product managers and engineering leads, influencing **10+ feature prioritization decisions**.
-

TECHNICAL SKILLS

- Backend & API:** Java (8–17), Spring Boot, Spring MVC, REST APIs, Microservices, JPA, Hibernate, JDBC, JSON
 - Frontend:** JavaScript (ES6+), React.js, Angular (basic), HTML5, CSS3, Bootstrap
 - Programming & Scripting:** Java, JavaScript, Python, Shell Scripting, SQL
 - Databases:** PostgreSQL, MySQL, SQL Server, MongoDB, Amazon RDS
 - Cloud Platforms:** AWS (EC2, S3, RDS, VPC, IAM, CloudWatch, CloudFormation), Azure (basic)
 - DevOps & CI/CD:** Docker, Jenkins, Git, GitHub, GitLab CI/CD, Ansible, Terraform (basic)
 - Data Engineering:** Apache Spark, Apache Airflow, Hadoop (HDFS, MapReduce), dbt
 - Monitoring & Logging:** AWS CloudWatch, CloudTrail, Prometheus, SolarWinds Orion
 - Reporting & Analytics:** Power BI, Tableau, Excel
 - Tools:** IntelliJ IDEA, Eclipse, VS Code, Postman, Linux Shell, Maven
 - Practices:** Code Reviews, Debugging, Unit Testing (JUnit), Integration Testing, Agile/Scrum
-

EDUCATION

Master of Science in Information Science/Studies | Trine University | VA, USA

Aug 2023 – May 2025

Bachelor of Technology in Computer Science | NRI Institute of Technology | AP India

Jun 2016 – May 2021
