PROFESSIONAL SUMMARY

Full-stack Software Engineer with proven expertise in developing scalable distributed systems and responsive user interfaces. Demonstrated ability in building full-featured search webpages using React, integrating cloud-based microservices, and applying machine learning techniques to solve complex problems.

EDUCATION

University of Florida
Bachelors of Science in Mathematics

- GPA: 3.84/4.0
- Graduated Cum Laude

Gainesville, Florida
May 2023

EXPERIENCE

Amazon

February 2024 – Current

Software Engineer II

Austin, TX

- Designed, managed, and productionalized a high-throughput, low-cost service handling 10K+ TPS API requests, ensuring 99.99% availability and minimal impact to downstream services.
- Developed a full search webpage using React for an engaging UI, integrated with a distributed search system managing petabytes of data, achieving sub-second latency using AWS Lambda, S3, and Elasticsearch.
- Implemented a full UI testing suite to improve CI/CD pipeline enhancements, ensuring robust front-end validation and reducing deployment failures by 30%

Amazon

May 2022 – July 2022

Software Engineer Intern

Austin, TX

- Developed a comprehensive catalog experience for managing high TPS security items with an emphasis on UI responsiveness and performance using modern front-end technologies.
- Increased unit test coverage by 15% through improved JUnit5 testing and mocking techniques.

University of Tokyo

June 2019 – July 2019

Visiting Researcher

Tokyo, Japan

- Developed a novel video prediction model using Convolutional LSTM and Artificial Neural Networks, improving forecast accuracy by 12%.
- Designed and deployed a remote GPU farm for efficient training and evaluation of machine learning models.

SKILLS

Languages: Java, Python, JavaScript, SQL, Bash, Cypher, Latex

Frameworks & Tools: Node.js, React, Express.js, JQuery, Neo4j, PyTorch, AWS, Flink, Hadoop, Git, Postman, Docker, Kubernetes

Methodologies: Agile, Scrum, Test-Driven Development (TDD), Continuous Integration/Continuous Deployment (CI/CD), Microservices Architecture, RESTful API Design, Cloud Computing, Serverless Architecture, Object-Oriented Programming (OOP), Distributed Systems, Scalable System Design
